case study

Go North East - office fit-out

Location: Gateshead, Tyne & Wear

Project Scope:

Office Options provided a complete furniture fit-out for Go North East's new Gateshead depot in 2014. A decade later the premises required a major redesign and Office Options again was tasked to provide an interior design and furnishing scheme for the new and more open plan layout, which was completed early 2024.

A space-planning exercise was undertaken with the help of scaled floorplans and 3D renders to visualise the new areas and ensure the furniture would work well in the new office and meeting room spaces.

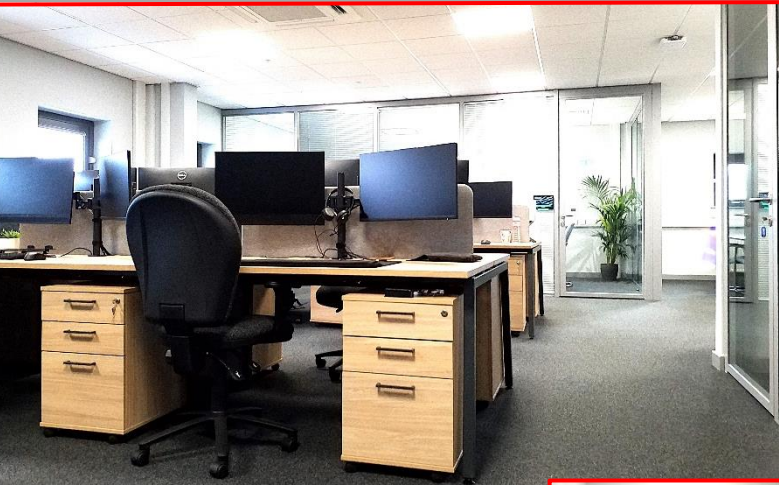

Furnishings included:

- Bench desking, pedestals, screens & task chairs
- Executive office furniture
- Monitor arms, under-desk power modules & cable management
- Board room & meeting room tables & chairs
- Custom IT workbench and storage solutions
- Break-out seating, high tables & dining furniture
- Reception area seating

The new offices are finished throughout in a light and calm neutral colour scheme; the final result is a vastly more efficient and much more open and inviting office, training and meeting environment!
